

Crediting Recipes in the CACFP

Tools needed:

- This Worksheet
- Recipe (use the *Southwest Chicken Quesadilla* recipe for example)
- CACFP Meal Pattern Reference Guide
- Using Ounce Equivalents for Grains Worksheet
- USDA Crediting Handbook/ USDA Food Buying Guide

Recipe *Southwest Chicken Quesadillas*

Ingredients

1/2 lb. (about 1 1/2 cups) shredded cooked chicken
 1/2 cup salsa
 1/3 cup green onions, sliced
 8 ct. whole-wheat tortillas (6 inches)
 1/4 cup butter, melted
 1 cup shredded cheddar cheese
 1 cup shredded Monterey Jack cheese

Directions

Combine chicken, salsa and onions in a bowl. Mix both cheeses together in a separate bowl. Brush one side of each tortilla with butter and place butter-side down on a lightly greased baking sheet. Spoon 1/4 cup of chicken mixture on half of each tortilla and sprinkle 1/4 cup of cheese blend on top. Fold plain side of tortilla over mix. Repeat for remaining seven tortillas and bake at 375° F for 9-11 minutes or until golden brown.

Lunch/Supper Crediting:
 16 servings ages 1-2
 10 servings ages 3-5
 8 servings ages 6-18

cacfp.org

- #1 List CACFP components in the recipe.** Some ingredients may need to be combined. In the example recipe, the cheese and chicken combine for the meat/meat alternate.
- #2 Use the CACFP Meal Pattern Cards.** Determine the number of servings required for each age group in each component.
- #3 Do the math.** Divide amount of component by amount required in the Meal Pattern. Use the Ounce Equivalents worksheet to calculate grain component serving sizes. Use the Crediting Handbook or the Food Buying Guide to verify how much of an ingredient is needed to yield the required crediting amount.
- #4 Determine the number of servings.** This is identified by the most limiting component, which is the ingredient that yields the fewest number of servings. In the example recipe, if it were being served to 3-5 year olds, the amount of grains would allow for 16 servings, but the meat/meat alternate component only allows for 10 servings. Therefore, the recipe yields 10 servings for ages 3-5.

Component	Ingredient	Amount	MP Requirement Per Age Group	Servings Per Component
Vegetable	salsa & green onions	(not enough to apply)	Ages 1-2 = 1/8 cup Ages 3-5 = 1/4 cup Ages 6-18 = 1/2 cup	
Fruit	none			(most limiting component)
Meat/Meat Alternate	combined cheese, shredded chicken	2 cups/8 oz 1/2 lb/8 oz	Ages 1-2 = 1 oz Ages 3-5 = 1.5 oz Ages 6-18 = 2 oz	16 servings 10 servings 8 servings
Grain	tortillas	8 count	Ages 1-2 = 1/2 oz eq Ages 3-5 = 1/2 oz eq Ages 6-18 = 1 oz eq	16 servings 16 servings 8 servings

Grain

Using Ounce Equivalents for Grains in the Child and Adult Care Food Program

Grains are an important part of meals in the Child and Adult Care Food Program (CACFP). To make sure children and adults get enough grains at CACFP meals and snacks, required amounts for the grains component are listed in the meal pattern as ounce equivalents (oz. eq.). Ounce equivalents tell you the amount of grain in a portion of food.

How Much Is 1 Ounce Equivalent?

20 cheese crackers
(1" by 1") = 1 oz. eq.

12 thin wheat crackers
(1 1/4" by 1 1/4") = 1 oz. eq.

5 woven whole-wheat crackers
(1 1/2" by 1 1/2") = 1 oz. eq.

Using the Grains Measuring Chart

The Grains Measuring Chart on pages 2-4 tells you how much of a grain item you need to serve to meet CACFP meal pattern requirements. To use this chart:

- 1 Find the grain you want to serve under the "Grain Item and Size" column.
- 2 Check if the chart lists a size or weight by the name of the grain. If the chart:
- 3 Find the column for the age of your participants and the meal or snack you are serving. This column lists the amount of a grain you will need to serve to meet the meal pattern requirement for grains.

Lists a weight for the grain, such as *at least 56 grams*, then use the Nutrition Facts label for the item you want to serve to make sure it weighs the same, or more than, the grain on the chart. See page 5.

Does not list a weight or size for the grain, then you do not need to check the size or weight of the product before using the chart.

Lists a size for the grain, such as *about 1 1/4" by 1 1/2"*, then check if the item is the same size, or larger than, this amount. See page 6.

Grain Item and Size	1- through 5-year-olds at Breakfast, Lunch, Supper, Snack
	Serve at Least 1/2 oz. eq., which equals about...
Pita Bread/Round (whole grain-rich or enriched) at least 56 grams*	1/4 pita or 14 grams
Popcorn	1 1/2 cups or 14 grams
Pretzel, Hard, Mini-Twist (about 1 1/4" by 1 1/2")**	7 twists or 11 grams

Tortilla, Soft, Flour (about 8")**	¼ tortilla or 14 grams	½ tortilla or 28 grams	1 tortilla or 56 grams
Waffle at least 34 grams*	½ waffle or 17 grams	1 waffle or 34 grams	2 waffles or 68 grams

*Check that the item you want to serve weighs this amount, or more. See "Using the Nutrition Facts Label" on page 5 for more information.

**Check that the item you want to serve is about this size or larger. See "Grains Measuring Tools" on page 6 for more information.

Using the Nutrition Facts Label

Some items on the Grains Measuring Chart may have weights listed by the name of the item. Follow the steps below to see if your grain meets the minimum weight listed in the chart:

- 1** Find the grain item and its minimum weight in the Grains Measuring Chart.

For example, the minimum weight for a pancake is at least 34 grams.

Grain Item and Size	Age Group and Meal		
	1- through 5-year-olds at Breakfast, Lunch, Supper, Snack	6- through 18-year-olds at Breakfast, Lunch, Supper, Snack Adults at Snack only	Adults at Breakfast, Lunch, Supper
Serve at Least ½ oz. eq., which equals about...	Serve at Least 1 oz. eq., which equals about...	Serve at Least 2 oz. eq., which equals about...	
Pancake at least 34 grams*	½ pancake or 17 grams	1 pancake or 34 grams	2 pancakes or 68 grams

- 2** Look at the Nutrition Facts label of the grain you wish to serve. Find the weight of the serving size (usually provided as grams (g)). One serving of Brand P pancakes weighs 117 grams.

- 3** Using the Nutrition Facts label, find how many items are in one serving. There are three pancakes in one serving of Brand P pancakes.

- 4** If there is more than one of an item in a serving, you will need to divide to find the weight of each item. For example, the serving size of Brand P pancakes is three pancakes.

Divide the serving weight by the number of items in one serving to find the weight of each item.

Brand P Pancakes

Nutrition Facts	
4 servings per container	
Serving size 3 Pancakes (117g)	
Amount per serving	
Calories	280
% Daily Value*	
Total Fat 9g	12%
Saturated Fat 1.5g	8%
Trans Fat 0g	

$$\begin{array}{ccccc} 117 \text{ grams} & \div & 3 \text{ pancakes} & = & 39 \text{ grams per pancake} \\ \text{Serving Weight} & & \text{Serving Size} & & \text{Weight of Each Item} \end{array}$$

Compare the weight of one item to the minimum weight listed in the Grains Measuring Chart (from Step 1). Is your item the same weight as, or heavier than, the minimum weight?

Yes: Use the Grains Measuring Chart to see how much of your grain to serve to meet CACFP meal pattern requirements. In the example above, pancakes must weigh at least 34 grams in order to use the Grains Measuring Chart. Because each Brand P pancake weighs 39 grams, you may use the chart as a guide to the minimum serving amount.

No: Use another method to determine how much of a grain item to serve. See “What If My Grain Is Different?” on page 6 for more information.

Are There Other Menu Planning Considerations?

If you serve an item that is larger, or weighs more, than what's listed on the Grains Measuring Chart, then you might serve more grains than required by the CACFP meal pattern. The Grains Measuring Chart can help make serving enough grains easier. However, the tools described under "What If My Grain Is Different?" can also help you determine how much of an item to serve to meet the meal pattern without serving more than what is needed.

What If My Grain Is Different?

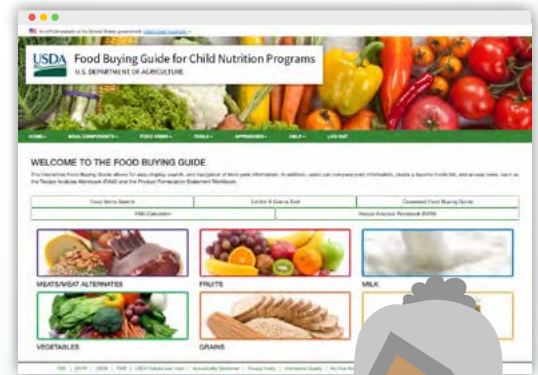

Is the grain item you want to serve:

- Smaller than the item listed on the Grains Measuring Chart?
- Lighter in weight than the item listed on the Grains Measuring Chart?
- Not listed on the Grains Measuring Chart?

If so, you will need to use another way to tell how much to serve in order to meet CACFP meal pattern requirements. You could:

- Enter information from the Nutrition Facts label into the *Food Buying Guide for Child Nutrition Program's (FBG) Exhibit A Grains Tool*.^{*} This tool will let you know how many ounce equivalents of grains are in one serving of the item.
- Use the *FBG Recipe Analysis Workbook (RAW)*^{*} to determine the ounce equivalents per serving for standardized recipes.

^{*}Available at <https://foodbuyingguide.fns.usda.gov>.

Grains Measuring Tools

Compare your food to the guides below to see if it is the same size or larger than the item listed on the Grains Measuring Chart.

Guides appear as actual size when this worksheet is printed at 100% on standard 8 1/2" by 11" paper.
