ALL DATA SUBJECT TO REVISION			
<p>1. States tend to distribute multiple months of P-EBT benefits in a single issuance. Benefits distributed in June, for example, may represent the value of P-EBT benefits for participants' virtual school days in the months of March through May.</p> <p>2. Because states distribute multiple months of benefits in a single issuance, participant counts must be interpreted with caution. Participants who receive a combined P-EBT benefit in June for the months of March through May will appear in the participant count for June only. A household or person who receives a combined benefit for March and April in June, and a second combined benefit for May and June in July will appear in the June and July participant counts. As result, the number of P-EBT beneficiaries is much greater than any single monthly count, but summing the participant counts across months will overstate the number of beneficiaries.</p> <p>3. States issue P-EBT benefits to individual children in cases when they are unable to group children into household units. This is sometimes an issue where P-EBT beneficiaries are not SNAP recipients. Because these children are counted as separate households, the household count in this table overstates the number of unique household beneficiaries.</p>

1. Data provided prior to January Keydata are fragmentary for the current fiscal year. These elements are reported 90 days after the close of the reporting period.  
 2. Participation data are estimated based on average daily meals served.  
 3. The waivers for SY 2020-2021 and SY 2021-2022 to support operations during the COVID-19 pandemic impacted the reporting of schools participating in NSLP and SBP. In SY 2020-2021 many schools served meals through the Summer Food Service Program and in SY 2021-2022 many schools served meals through the Seamless Summer Option (SSO).
